

# Long Road Home Stage Plot / Tech Rider

## Provided by Long Road Home:

- Two (2) AT-4040 microphones

## Provided by Venue:

- The AT-4040 microphones will need phantom power from the sound board
- Two (2) boom microphone stands for the AT-4040's (the kind that have a vertical arm and then one at an angle - not the kind that just have a microphone clip on the top of a vertical part)
- Three (3) XLR microphone cables. Two for the AT-4040's, and one for the SM-57 for the bass (see next item).
- We usually don't mic the bass (it just goes through the two main mics), but in the event that the room needs more bass, we will use an SM-57 microphone which we will place under the bass tailpiece.
- 1 wooden stool
- 1 extension cord
- We like to have a rug down on the stage under the band to minimize the sound of feet on a wooden stage.
